ABOUT THE PROGRAM

The All-on-X and GBR weekend warrior course offers a comprehensive learning and training experience for dentists seeking to enhance their skills in this advanced implant treatment. Over the years, the All-on-X treatment concept has dramatically changed the quality of life for both edentulous and soon-to-be edentulous patients. Nonetheless, proper patient selection and treatment planning are needed for a successful treatment outcome. The curriculum of the course spans various crucial aspects of All-on-X treatment, ensuring participants gain comprehensive knowledge and practice skills. On day 1, we will begin the course with an in-depth exploration of the All-on-X concept, followed by diagnosis, treatment planning, surgical techniques, and restorative procedures. On day 2, particular emphasis is placed on guided bone regeneration and sinus augmentation procedures that will enhance clinician's ability to handle difficult clinical scenarios. Participants will engage in interactive discussion, case presentation, and Q/A sessions facilitated by esteemed faculty members from the Harvard School of Dental Medicine.

WHAT TO EXPECT

HARVARD
School of Dental Medicine
Division of Periodontology

Oct. 19, 2024: All-on-X Mini Residency (Day 1)

09:00 AM – **All-on-X Step-By-Step Surgical Techniques**
